

Marmo di Venezia[®] Sapone

Mod. 51 Rev 64

Date of update 11/12/2019

CHARACTERISTICS:

Neutral, water-repellent sealer, permeable to water vapour. **MARMO DI VENEZIA[®] SAPONE** is a paste made of completely organic materials. Once applied it gives the surface an attractive and shiny appearance, smooth and resistant to the penetration of grease and dirt. When applied on lime finishes it triggers a chemical reaction that promotes the carbonatation process, which favours the curing and hardening of the lime-based finish.

USE:

Protective water-repellent sealant for Venetian plaster, stucco, polished plaster, lime and silicate paints. It protects the surface and preserves the naturalness of the system.

PREPARATION AND APPLICATION:

Apply an extremely thin layer of **MARMO DI VENEZIA[®] SAPONE** on the perfectly dry surface with a stainless steel trowel, briskly passing with the sharp edge to avoid accumulations and to uniformly distribute the product.

Polish with a cloth or woolen pad, by hand or with a slow polishing machine.

IMPORTANT NOTES:

- Before application, make sure that the surface is perfectly dry and cured, that it is not dusty or chalky. Surface must be clean and free from oil, grease, mould, fungus, bacteria, efflorescence or any other defect that could impair adherence or successful results.
- Do not allow product to freeze (minimum 5°C).
- Store product in a cool, dry place and do not expose to direct sunlight.
- Use product at a temperature of the work environment and treated surface between 8°C and 35°C. Relative humidity must not exceed 75%
- Do not allow drying to take place with temperature of the work environment and treated surface below 5°C.
- Wash all equipment with water immediately after use.

TECHNICAL DATA:

Drying time at 20°C	Touch dry 15 – 30', In depth 8 – 12 h
Consumption rate	0.045-0.065 kg/m ²
Appearance	Thick whitish paste
pH	~ 8
Product type	Water-based
Packages	2.5 kg
